

Find out what film genres already exist in the category table

```
SELECT *  
  
FROM category;
```

Add the following genres to the category table: Thriller, Crime, Mystery, Romance, and War

```
INSERT INTO category (name)  
  
VALUES ('Thriller'), ('Crime'), ('Mystery'), ('Romance'), ('War');
```

Update 'African Egg' to the genre thriller

```
UPDATE film_category  
  
SET category_id = 17  
  
WHERE film_id = 5;
```

Delete the mystery genre from the category table

```
DELETE FROM category  
  
WHERE name = 'Mystery';
```

Create a table called 'Employees'

```
CREATE TABLE EMPLOYEES  
  
(  
  
employee_id VARINT(30) NOT NULL,  
name VARCHAR(50),  
contact_number VARCHAR(30),  
designation_id INT,
```

```
last_update TIMESTAMP NOT NULL DEFAULT now(),  
constraint employee_pkey PRIMARY KEY (employee_id)  
)
```
